Make The Negev Green

The 1962 Israel Bond Campaign will be launched in a week's time. Our community has established a remarkable is record in purchasing bonds.

The Israel Bond Program was the inspiration of David 📔 Ben-Gurion. In the ten years since the first sale to the United States, they have more than shown their impor-1. tance to the economy of Israel. Bonds are investment dollars. They have been used to help establish new industry, h develop resources, to help finance housing, to build railways and to establish entire new communities. Now that the northern half of Israel has been relatively well industrialized and is being intensively farmed, the next great task is to make the Negev green.

In Biblical times, the southern half of Israel supported [] a large population. Today, we must make the Negev flourish again, for it is this area which must become home for the many immigrants who are streaming into the country daily. It is this large area which must be populated in order to safeguard the State from its hostile neighbours. A populated Negev wil mean a more secure Israel.

Your investment in Israel Bonds is a declaration of h faith in the future of Israel. It is a safe and wise investment, an investment in the future of Israel and of the Jewish
